

Code	Paper No.	Name	Title
Aero-Acoustics			
AA01	3	Alam, F	Surface Pressure Measurements on a group of Idealised Road Vehicle Models
AA02	139	Liow, K	Computation of Acoustic Waves Generated by a Co-Rotating Vortex Pair
AA03	155	Milbank, J	An Instance of Cavity Resonance Interaction with an Open-Jet Tunnel Free Shear Layer
AA04	237	Tan, B	Simulation of Acoustic Resonance Generated by Flow Around a Long Rectangular Plate Placed in a Duct
AA05	271	Zimmer, G	The Contribution of the A-pillar vortex to passenger car in-cabin noise
Aerodynamics			
AD01	35	Cheung, K	Interference Drag Between Spherical and Cylindrical Particles in Stokes Flow
AD02	93	Holford, J	The Dependence of the Discharge Coefficient on Density Contrast - Experimental Measurements
AD03	95	Hooper, J	Mean Velocity, Reynolds Stress and Static Pressure Measurements in an Air Cyclone
AD04	106	Jackson, P	Some Aspects of the Aerodynamics of Membrane Wings
AD05	146	Matheson, N	Research and Testing in the New Transonic Wind Tunnel at AMRL
AD06	173	Otto, S	Gortler Vortices in Curved Mixing Layers and Their Effect on the Inherent Instabilities
AD07	175	Panchapakesan, N	PIV Measurements in a Forced Separated Shear Layer from a Blunt Leading Edge
AD08	177	Parker, K	Impulsively Started Flow over an Airfoil at an Angle of Attack
AD09	249	von Ellenrieder, K	Visualization of a Three Dimensional Heaving Aerofoil Flow
AD10	253	Watkins, S	The Aerodynamic Characteristics of a Family of Flying Wing Shapes Suited for Small RPVs
AD11	258	Wood, D	How Accurately is a Helical Vortex Represented by Straight Segments?
AD12	265	Young, J	Frequency and Amplitude Effects in the Wake of a Plunging Airfoil
AD13	276	Pearson, B	Re Dependence of the Energy Dissipation Rate and Spectrum in Shear Flows
AD14	64	Dou, H	Physical Mechanism of Incipient Separation in Shock Wave / Boundary Layer Interactions Induced by a Sharp Fin
Atmospheric Research			
AR01	14	Borgas, M	Particle-Pair Separation Processes in Turbulence
AR02	206	Sawford, B	Project Prairie Grass - a Classic Atmospheric Dispersion Experiment Revisited
Boundary Layers			
BL01	11	Blackburn, H	Symmetry Breaking to Modulated Rotating Waves in an Enclosed Swirling Flow
BL03	23	Lai, K	Pressure field calculation in flow simulation by discrete vortex method
BL04	37	Choi, J	Turbulent Drag Reduction by Spanwise Wall Oscillation
BL05	54	Dabrowski, P	Blowing-Induced Boundary-Layer Separation of Shear-Thinning Fluids
BL06	61	Bisceglia, S	Structure of Rough Wall Turbulent Boundary Layers at Relatively High Reynolds Number
BL07	84	Halatchev, I	The Effect of Diffusive Mass Transfer on Boundary-Layer Stability
BL08	88	Hellstedt, A	Turbulent Boundary Layer Evolution Towards Equilibrium Conditions
BL09	104	Ichimiya, M	Interaction Between Turbulence Wedges which Develop from Roughness Row in a Flat Plate Laminar Boundary Layer
BL10	109	Jones, M	Experimental Study of High Reynolds Number Turbulent Boundary Layers - Mean Flow Scaling
BL11	121	Kim, K	Assessment of Local Blowing and Suction in a Turbulent Boundary Layer
BL12	126	Kosasih, P	Flow Field Calculation in a Turbulent Lubrication Film
BL13	129	Kaspersen, J	A Structure Detection Method Based on Wavelets
BL14	131	Kunkel, G	Experimental Study of Near-Wall Models for Large-Eddy Simulation
BL15	157	Moinddin, K	Experimental Study of Turbulent Flow Along a Streamwise Edge (Chine)
BL16	165	Nickels, T	The Mean Velocity Profile for Wall-Bounded Flows at Low Reynolds Number

BL17	174	Oyewola, O	Effect of Wall Suction on a Turbulent Boundary Layer: Reynolds Number Dependence
BL18	198	Roberts, J	Artificial Thickening of Wind Tunnel Boundary Layers via an Array of Cross-Flow Jets
BL19	243	Tuck, E	On Open Venturis
BL20	245	Mesbah Uddin, A	Interpretation of Space-time Velocity Correlations in Wall Turbulence
BL21	254	Watson, C	The Structure of Longitudinal Vortices Within the Atmosphere
BL22	273	Gualtieri, P	A Correct Model of Variance, Skewness, Kurtosis in Boundary Layer with Turbulent External Layer
BL23	280	Berera, F	Pressure Fluctuations on Cylinders with Thick Turbulent Boundary Layers in Axial and Near-Axial Flow

Combustion

CO01	31	Chen, Y	Combined PDA/LIF Measurements in Simple, Evaporating Turbulent Spray Jets
CO02	63	Doolan, C	Hydrocarbon Fuelled Pulse Detonation Engine Analysis
CO03	96	Hossain, M	Modelling of Coal Combustion in Full-Scale Industrial Furnace
CO04	117	Kollmann, W	The Impact of Strong Swirl and Buoyancy on the Structure of Turbulent Jets and Flames
CO05	141	M Al-Abdeli, Y	Flowfield Regimes of Non-Reacting Swirling Flows
CO07	236	Syred, C	Comparisons of Isothermal and Combusting Jets
CO08	272	Chen, Y	Characterization of Turbulence Generated by Perforated Plugs of Different Hole Sizes Placed Upstream of a Bunsen Burner
CO09	286	Dally, B	The Effect of Oxygen Concentration on the Structure of Turbulent Nonpremixed Flames

Computational Fluid Dynamics

CF01	9	Bertoglio, J	Decay of Wall Bounded Turbulence and Turbulent Scalar Field
CF02	22	Bui, A	A Numerical Method for Modelling of Two-Fluid Flow -- Solid Interaction
CF03	40	Christo, F	Assessment of Turbulence Models for Simulating Internal Reacting Flows in a Ducted Rocket
CF04	55	Debroux, F	Three-Dimensional Modelling of a Tsunami Interacting with Real Topographical Coastline Using Smoothed Particle Hydrodynamics
CF05	62	Djenidi, L	Modelling of the Effect of Concentrated Wall Suction on a Turbulent Boundary Layer Using a Second-Order Moment Closure
CF06	69	Elston, J	The Transition to Three-Dimensionality in the Flow Produced by an Oscillating Circular Cylinder
CF07	74	Fonarev, A	An Effective Method of Calculating Transonic Flows and Wave Drag of Axisymmetric and 3-D Elongate Bodies Within Framework of Transonic Equivalence Rule
CF08	83	Guo, B	Effect of a Downstream Sudden Contraction on Flow Instability Behind a Sudden Pipe Expansion
CF09	86	Pai, R	Modelling of Fluid Flow in a 3-Axial Groove Water Bearing Using Computational Fluid Dynamics
CF10	89	Higgins, K	Merger of Stretched Vortices at High Reynolds Number
CF11	107	Djavarehshkian, M	A New NVD Scheme in Pressure-Based Finite Volume Methods
CF12	108	Johnson, S	Flow Past Elliptical Cylinders at Low Reynolds Numbers
CF13	110	Jones, M	The Generation and Suppression of Vortex Breakdown by Upstream Swirl Perturbations
CF14	111	Jones, M	Toward a Geometry Independent Criterion for Vortex Breakdown
CF15	114	Tso, C	A Three-Dimensional Simulation of Temperature and Water Vapor Distributions Between a Heat Source and a Ventilating Hood
CF16	135	Lei, C	Two- and Three-Dimensional Temperature Structures in a Shallow Wedge Subject to Solar Radiation
CF17	150	McBean, I	Navier-Stokes Simulation of 2-D Unsteady Aerodynamics of a Turbine Cascade
CF19	168	Novozhilov, V	Large Eddy Simulation of Transient Ceiling Jet in a Compartment Fire Environment
CF20	169	O' Neill, P	An Investigation of the Relationship Between Flow Topology and the Distribution of a Passive Scalar in Isotropic Turbulence
CF21	172	Ooi, A	A Numerical Study of Swirling Vortex Rings
CF22	185	Prakash, M	Three-Dimensional Modelling of Dam-Break Induced Flows Using Smoothed Particle Hydrodynamics
CF23	187	Pregalato, C	Flow Transition in the Wake of a Rotating Sphere
CF24	203	Ryan, K	Three Dimensional Flow Development in the Wake of Elongated Bluff Bodies
CF25	207	Schmidt, S	Spectral Element Based Dynamic Large Eddy Simulation of Turbulent Channel Flow
CF26	211	Seyedein, S	Mathematical Modelling of Magnetic Flow Control in a Single Belt Caster

CF27	213	Sheard, G	A Numerical Study of Bluff Ring Wake Stability
CF28	215	Shiqiang, W	Quasi-Consistence Hexahedral Element Method for Three-dimensional Convection Problems
CF29	222	Soodphakdee, D	CFD Code Benchmark on Void Fraction Distribution in Subcooled Flow Boiling of a Concentric Annular Tube at Low Pressure
CF30	226	Spong, E	Adaptive Electromagnetic Control of Artificially Induced Disturbances
CF31	229	Stosic, Z	Multi-Fluid Multi-Dimensional Numerical and Experimental Investigation of Dispersed Two-Phase Flow with Wall Liquid Film in the Vicinity of Obstacles
CF32	230	Stosic, Z	3D Propagation of CHF/Rewet Front within Rod Bundle in Turbine-Trip-w/o-Bypass Simulation: Experimental and Numerical Investigation Based on Porous Media
CF33	247	Francois, B	Large Eddy Simulations of Plane Turbulent Impinging Jets
CF34	277	Barth, W	Finite Element Modeling of Generalised Newtonian Flows

Experimental Techniques

ET02	70	Erm, L	Measurement of Flow-Induced Pressures on the Surface of a Model in the AMRL Water Tunnel
ET03	102	Parmigiani, H	Residual Swirl in Axial-Flow Pump
ET04	134	Lavoie, P	Analysis of Four Data Reduction Schemes Applied to Four-sensor Hot-wire Probes
ET05	138	Li, J	An Investigation on the Length to Diameter Ratio of Hot Wire Filament in Turbulence Measurements
ET06	164	Ng, E	Measuring Local Time-Averaged Airflow Velocity Through an Automotive Heat Exchanger
ET07	166	Nishizawa, M	A Single Moduled Laser Interferometer for Wall Shear Stress Measurement
ET08	208	Anderson, C	Manipulation of Natural Frequency Separation to Improve Dynamic Response of Hot-Wire Probes
ET09	246	Viot, J	Characterisation of the Plug-Holing Phenomenon for the Exhausting of a Low Density Gas Layer
ET10	267	Zhou, T	Transverse Velocity and Temperature Derivative Measurements in Grid Turbulence
ET11	268	Zhou, T	Performance of an Energy - Temperature Dissipation Rate Probe in Decaying Grid Turbulence
ET12	270	Zhu, Y	Rapid Measurement of Bubble Size in Gas-Liquid Flows Using a Bubble Detection Technique

Gas Dynamics

GD01	99	Hunt, G	Natural Ventilation by the Competing Effects of Localised Distributed Heat Sources
GD02	189	Quadros, C	Effect of Column Spacing on Wave Force
GD03	191	Rahaman, M	Effect of Unequal Granular Temperature on Number of Collision and Dilute Viscosity of Kinetic Theory
GD04	212	Sharifian, S	Optically Addressed Pressure Sensors for Transient Gas Dynamics: Calibration of a Preliminary Design
GD05	217	Siegenthaler, A	Outline of a Theory of Non-Rankine-Hugoniot Shock Wave in Weak Mach Reflection
GD06	219	Smith, D	Shape Optimisation for Supersonic Nozzle Flows

Groundwater

GW01	220	Smith, A	Assessing the Accuracy of a Finite Element Code in Solving the Advection-Diffusion Equation Using the Gauss Pulse Test
------	-----	----------	--

Hydraulics

HL01	46	Clarke, S	Supercritical Leaps in Two-Layer Hydraulics
HL02	91	Ho, D	Investigation of Spillway Behaviour Under Increased Maximum Flood by Computational Fluid Dynamics Technique

Hydrodynamics

HD01	38	Chow, M	Effect of Double Diffusion on Mixing of Discharges from Coastal Outfalls
HD02	58	Derzho, O	Breakdown of Inertial Waves in a Tube with Variable Cross-Section
HD03	72	Farrow, D	Inertial Oscillations and the Thermal Bar
HD04	79	Gregory, P	Flow Over a Body of Revolution in a Steady Turn
HD05	87	Hashim, I	On Competition Between Modes at the Onset of Thermocapillary Convection Under a Uniform Vertical Magnetic Field
HD06	97	Hourigan, K	Structure of Vortex Breakdown in a Torsionally Driven Cylinder at Low Reynolds Number
HD07	124	Klaka, K	Prediction of Yacht Roll Motion at Zero Forward Speed
HD08	128	Kostas, J	A Study of a Backward Facing Step Flow at Two Reynolds Numbers
HD09	136	Lemckert, C	Water Column Destratification Using a Pulsed Jet System

HD10	167	Noui-Mehidi, M	An Experimental and Numerical Investigation of Taylor Vortex Flow in the System of Coaxial Rotating Conical Cylinders
HD11	200	Broutman, D	Internal-Wave Radiation From an Oscillatory Source in a Depth-Dependent Medium
HD12	231	Stretch, D	Transient Mixing Events in Stably Stratified Turbulence
HD13	259	Xia, J	Wave Forces on a Body in Confined Waters
HD14	261	Wang, X	Experimental Observations of Rayleigh-Taylor Instability in a Shock Tube
HD15	274	Brandner, P	Hydrodynamic Performance of a Vortex Generator
HD16	278	Shervani-Tabar, M	Numerical Study on the Dynamics of a Cavitation Bubble Near a Rigid Body

Industrial Flows

IF01	2	Ahmed, D	Numerical Simulation of Abrasive Water Jet for Different Taper Inlet Angles
IF02	50	Cooper, P	Plumes Driven by Free-Falling Streams of Solid Particles
IF03	100	Huntsman, I	A 3D Navier-Stokes Solver for the Design and Analysis of Turbomachinery
IF04	103	Huynh, B	Influence of Temperature Boundary Conditions in the Wire-Coating Process
IF05	161	Mununga, L	Comparative Study of Flow in a Mixing Vessel Stirred by a Solid Disk and a Four Bladed Impeller
IF06	209	Truong, T	Using Free and Restricted Sloshing Waves for Control of Structural Oscillations
IF07	210	Gradinscak, M	Sloshing Control with Container Flexibility
IF08	221	Soh, W	A Flow Visualization Study on the Movements of Solid Particles Propelled by a Collapsing Cavitation Bubble
IF09	228	Stokes, Y	Computing Flow in a Spiral Particle Separator
IF10	275	Akroyd, T	Continuous Rheometry for Industrial Slurries

Jets and Wakes

JW01	4	Allen, J	Energy Harvesting Eel
JW02	12	Blackburn, H	Large Eddy Simulation of Flow Past a Circular Cylinder
JW03	20	Brydon, A	Flow Interaction Between Two Spheres at Moderate Reynolds Number
JW04	24	Lai, K	On the Mechanisms of Wake-Body Interactions in a Tandem Array of Two Square Cylinders
JW05	26	Carberry, J	A Comparison of Forced and Freely Oscillating Cylinders
JW06	27	Cater, J	The Structure of Round Zero-Net-Mass Flux Jets
JW07	41	Chua, L	Measurements of a Rectangular Confined Jet
JW08	42	Chua, L	Measurements of Turbulent Prandtl Number of a Heated Square Jet
JW09	43	Chua, L	Axis-Switching of a Square Jet
JW10	48	Clayfield, K	Velocity Measurements in a Mechanical Precessing Jet Flow Using Particle Image Velocimetry
JW11	71	Ewing, D	On the Evolution of the Large-Scale Structures in the Far Field of the Plane Jet
JW12	78	Gordon, M	Scalar Mixing of Zero-Net-Mass-Flux Jets in Crossflow
JW13	81	Grubb, C	The Influence of the Nozzle Outlet Shape on Swirl Flow
JW14	94	Hong, G	On Centerline Distributions of Velocity and Momentum in Synthetic Jet Actuator Flows
JW15	125	Kolar, V	Vorticity Transport Associated with the Dominant Vortical Structure of Twin Jets in Crossflow
JW16	133	Lai, W	Effect of a Neighbouring Vibrating Cylinder on a Circular Cylinder Wake
JW17	137	Holstein, D	Spreading of Energetic Submerged Fountains Impinging on a Rigid Surface
JW18	143	Mallier, R	Three Dimensional Transition in a Bickley Jet: Comparison of Theory with DNS
JW19	144	Mallinson, S	Numerical Simulation of Membrane Forcing Effects On Synthetic Jet Actuator Flows
JW20	159	Morgan, P	Bifurcation of Neutrally Buoyant Jets in Stratified Environments
JW21	170	O' Neill, P	Structures in a Round Homogeneous Jet at Low Reynolds Number
JW22	176	Parker, R	Control of an Axisymmetric Jet Using a Passive Ring
JW23	179	Pearson, B	Further Evidence for a Transition in Small-Scale Turbulence

JW24	182	Pianthong, K	Study of Shock Wave Characteristics of Supersonic Diesel Fuel Jets Using a Shadowgraph Technique
JW25	194	Reichl, P	Metastable Wake States for Flow Past a Cylinder Close to a Free Surface
JW26	214	Carberry, J	Stationary and Oscillating Cylinders in the Presence of a Free-Surface
JW27	218	Smalley, R	Velocity-Velocity Difference Correlations and the Sweeping Decorrelation Hypothesis
JW28	241	Thompson, M	Application of the Forced Stuart-Landau Model to Cylinder Wake Oscillation
JW29	256	Webb, T	Large Eddy Simulation of a Turbulent Jet
JW30	269	Zhou, Y	Effect of Initial Conditions on the Turbulence Structures Various Scales in a Self-Preserving Wake
