**15th annual Honours
Project Exhibition**

Mechanical Engineering

Honours Student Project Exhibition

You are invited to attend the School of Mechanical Engineering's 15th annual Honours Project Exhibition, a display of exciting projects developed by the engineers of tomorrow.

This must-see event is a highlight in the science and technology calendar. It will feature diverse projects such as the Formula SAE Racing Car, the Ballbot (a robot capable of balancing on a ball), the Monowheel or Wheelbike similar to the one in Star Wars Episode III and the Hi Speed Bio-diesel Bike capable of breaking a land speed record – all under one roof at the Adelaide Showgrounds.

Come and try your hand on Edgar the self-balancing scooter, or pit yourself against the computer to keep a pendulum inverted upright, or try to get a ball in the centre of a floating table.

This is a unique opportunity to encounter engineering in practice, to learn what it really means to be an engineer and to engage with final year engineering students as they share their experiences.

When: Thursday 22 October, 9am to 4pm

Where: Adelaide Showgrounds. Goyder Pavilion

FREE entry

FREE car and bus parking off Rose Terrace

Bus drop off zone Goodwood Road
